AEOTrack

AEOTrack shows whether ChatGPT, Gemini, Claude, Perplexity and Grok name your business or a competitor, and which pages they read.

AEOTrack checks the questions your buyers ask in ChatGPT, Gemini, Claude, Perplexity and Grok, with each engine's live web search on, and shows who each answer names: you, a competitor or nobody. Every number links to the answer text, the question, the date, the engine and the pages it cited, so you can check it yourself. Scores come with the range to expect between two checks. Checks run weekly, and daily on your most important questions. The Agency plan covers 10 client websites with white-label PDF reports and client share links. Prices are public: Starter $39, Pro $99, Agency $249 a month, Enterprise from $799 a month billed annually. Try it free for 7 days on Starter limits, no card needed.
